# ABGO

HEATING PRODUCTS & SPARES

NATIONWIDE SUPPLIER OF OIL FIRED PRODUCTS AND SPARES TO THE TRADE

ABGO offer a nationwide mail order service supplying Oil & Gas Heating & Range Cooker spares to the trade. Our highly experienced technical sales staff are available to assist you with all of your requirements.

We provide a first class, prompt and reliable service from a wide and varied stockholding geared towards our customers' needs.
This guide has been produced to help assist the Heating Professional, and is based on manufacturers information that we believe to be accurate, however ABGO cannot accept responsibility for incorrect part selection. E & OE. Please see our Terms & Conditions of sale, available upon request.

PLEASE CALL US FOR YOUR SPECIFIC BUYING PRICES, WE GIVE OUR BEST PRICES TO HEATING ENGINEERS

The products in this guide are our normally stocked products and are the main serviceable parts which are commonly replaced, please contact us for other items in the range not shown.
We also have many other brands available, please see list below.

ABGO are committed to supporting Heating Engineers.
The pressure of modern business life can cause the little everyday courtesies to be forgotten. At ABGO, we would like you to know that we appreciate your business and thank you for giving us the opportunity of being of service.

RETURNS

In the unfortunate instance that you receive faulty or damaged goods please contact the ABGO sales office for a returns number. Please have the Invoice number to which the goods were supplied on when contacting us, with the fault that you believe to be on the component, this must be stated on the return forms in order for the manufacturer to investigate.
Goods can no longer be returned under any circumstances without ABGO returns paperwork included with returned goods. Goods ordered incorrectly must be returned within 7 days of purchase.
Handling charges will apply and the goods must be in a re-saleable condition. We are unable to accept any unwanted Electronic/PCB goods where the security-seal has been broken.

ABGO is part of
UKE UK Electric

CONTENTS

RDB NEUTRAL OIL BURNERS

The Riello RDB series of one stage light oil and kerosene burners is available in eleven basic models, with an output ranging from 16.8 to 120 kW, in three different structures.
The models are available in light oil and kerosene versions, conventional flue and balanced flue, with or without the fuel pre-heater fitted. A new model has been specifically designed to meet the increasing trends towards high pressure working field demand.

No	Model
3513008	RDB1 Neutral Burner - 16.8 - 26.3kW
3513603	RDB2 Neutral Burner - 24 - 38.3kW
3748950	RDB3 Neutral Burner - 35.6 - 68.7kW

RDB BALANCED FLUE KIT

All the RDB series models are easily converted from conventional flue to balanced flue, by replacing the plastic screen on the air intake with the connector for the air supply pipe.

No: **3062774**

R40 SINGLE STAGE OIL BURNERS

The Riello 40 G series of single stage light oil burners, is a complete range of products developed to respond to any request for home heating. The Riello 40 G series is available in eleven different models, with an output ranging from 12 to 240 kW, divided in four different structures.

All the models use the same components designed by Riello for the Riello 40 G series. The high quality level guarantees safe working.

No	Model
20030780	R40 G3B 19kW - 35kW
20030785	R40 G5 26kW - 60kW
3746467	R40 G10 54kW - 120kW
3747469	R40 G20 95kW - 213kW
3748251	R40 G20S 95kW - 240kW

ECOFLAM MAX OIL BURNERS ON/OFF TW

- New high efficiency fan ventilation system (HPV) allowing easy matching with boilers having high combustion chamber back pressure
- Sealed aluminium casing with a new modern design cover
- Compact burner dimension with low noise levels
- New air damper with progressive micrometric air regulation
- New electrical wiring simple to disassemble for easy maintenance
- Air damper with 60 or 80mm snorkel adaptor for conventional & balanced flue
- Combustion head easy to assemble and fully adjustable for fine set up
- Single bolt burner fixing and the possibility to firmly secure it to the flange in three different positions for easier maintenance
- Monoblock electrodes for easy and steady installation into the nozzle even after maintenance
- Hi-Low version available with compact hydraulic system (Max AB HS)
- Low NOx version with yellow flame developed by Ecoflam
- Max range available with "D" pump for light oil with viscosity up to 200 cTs
- Full memory & diagnostic capability

DIAGNOSTIC TOOL

- Able to read burner memory
  Lock outs - What they are - How long the burner has run
- Easy to read symbols - No flashing error code.
- Faults displayed such as - No Air, No Fuel, Stray Light, Low Gas
- Reads Flame signal with Burner running Gas and Oil

No: **3142931**

OIL BURNERS - EOGB

ST SERIES OIL BURNERS

This burner is suitable for use with both light oil and kerosene with single stage on/off operation. Available for both conventional and ducted air options and is typically suitable for domestic and commercial hot water boilers.

Balanced flue available as an extra.

Key Features:

• Quick and easy installation

• Reliable and trouble free operation

• Industry standard components available

• Most components can be easily accessed allowing for easy maintenance

All Sterling burners have been designed in accordance with EN267.

No	Model
ST35 S1S 63	Sterling Light Oil Burner 14-28kW
ST40 S1S 63	Sterling Light Oil Burner 18-39kW
ST50 S1S 76	Sterling Light Oil Burner 24-66kW
ST90 S1S 80	Sterling Light Oil Burner 47-119kW
ST130 S1S 140	Sterling Light Oil Burner 59-158kW

M SERIES OIL BURNERS

This burner is typically suited for commercial hot water boiler and steam boiler systems.

Available for use with light oil Class D fuel with:
• Single stage on/off
• 2 stage high/low

Key Features:
• Quick and easy installation
• Reliable and trouble free operation
• Industry standard components available
• Most components can be easily accessed allowing for easy maintenance

No	Model

MOL 350 T1L 172 2H	95 - 350 kW Oil High Low 1 Phase

X SERIES OIL BURNER RANGE

The X Series oil burner range is the latest from EOGB, a company renowned for high quality, technical excellence and environmentally safe products.
Three models, with outputs ranging from 14-100kW, can be configured for conventional or ducted air inlets to suit installations in domestic, commercial and light industrial premises.

Suitable for use with Kerosene, Gas Oil and FAME based Bio Fuel blends up to B10 as standard. B30 spec can be supplied under special order.

No: **X400** 14-36 kW
No: **X500** 34-62 kW
No: **X600** 50-100 kW

BALTUR COMMERCIAL OIL BURNER RANGE

TECHNICAL AND FUNCTIONAL CHARACTERISTICS

• Single stage operation (on/off)
• High pressure mechanical atomisation of fuel using nozzle
• Ability to obtain optimal combustion values by regulating combustion air and blast-pipe
• Maintenance facilitated by the fact that the atomisation unit can be removed without having to remove the burner from the boiler
• Manual air flow adjustment
• When using biodiesel light oil (fuel vegetable origin), the burner must be built with specific components: flexible hoses, line filter and pump.
• Equipped with one 7-pole connector, one flange and one insulating seal for boiler fastening, 2 flexible hoses, one line filter and one nozzle
• On request: longer blast tube, operation on biodiesel

Suitable for use with Gas oil, plus FAME based Bio Fuel blends up to B10 as standard. RME Bio fuels require Heavy Oil Burner specification. Burners suitable for higher blends are available.

DANFOSS OIL NOZZLES

Developed for optimum combustion of kerosene in domestic oil burners. Oil nozzles type EH and ES are designed for domestic high-pressure oil burners operating with kerosene. The nozzles are equipped with sintered bronze filters. Existing oil nozzles e.g. S and H can directly be replaced by the new ES - EH.

Identification

The nozzle is marked with the following information:

Danfoss	Kg/h 1.80	OK	[ ]	0.60	60°ES

OFTEC-specification

1.80	Specified capacity (kg/h)
OFTEC specification point	800 kPa (8 bar), 1.65 cSt., 790 kg/m³ Capacity tolerance: ± 5%
OK	OFTEC Kerosene certification
[ ]	Serial number for internal use
0.60	Reference capacity (USgal/h)
Reference specification point:	700 kPa (7 bar), 3.4 cSt., 820 kg/m³
60° ES	Spray angle & pattern (EH = Hollow) (ES = Solid)

Developed – designed – tested for kerosene application

The kerosene nozzle series meets the requirements of the OFTEC kerosene nozzle standard OFS E100

LICENCE No:
CERTIFIED TO:

Oil nozzles type EH and ES are designed for domestic high-pressure oil burners operating with kerosene. They are available with 2 different spray angles and sizes from 0.4 to 1.10 USgal/h.

The nozzles are equipped with sintered bronze filters.

Our existing oil nozzles e.g. 60°S and 80°H can directly be replaced by our new 60°ES - 80°EH,

Application and Features
• Kerosene
• OFTEC certification (OFS E100)
• 100% test of capacity and performance

DELAVAN

DELAVAN NOZZLES FOR OIL BURNERS RUNNING KEROSENE FUEL

Delavan created its nozzle using bi-metal construction. The brass body and stainless steel metering parts permit machining to close tolerances for precision and consistently high performance.

BRASS transmits heat fast from the nozzle face to reduce the possibility of varnish and oil residue build-up.

STAINLESS STEEL provides that extra Durability for metering parts where wear is a factor.

TYPE W nozzles are neither truly hollow nor solid. These nozzles frequently can be used in place of either solid or hollow cone nozzles between 0.40 and 8.00GPH, regardless of the burner's air pattern.

Precise spray angles and optional spray uniformity through new machining process

Reduced distributor size with shorter tangential slots to avoid plugging

Aerodynamic body configuration

Rolled threads to avoid metal chips and burrs

Sintered filter for maximum protection; sized depending on flow. Mesh strainer supplied on 2.00 GPH and higher flow rates.

100% Tested

Every nozzle tested. Then we go one step further and clean the test oil from the nozzle to avoid plugging.

OIL TANK OUTLET KITS

• Valve - Body, nickel-plated brass 1" BSPT male inlet x 1/2" BSPP male outlet with internal chamfer, fitted with 50mm lever as standard. Internals, stainless steel, PTFE seat, Viton seals
• Supplied with Heldite jointing compound, PTFE tape & "Snug-fit" brass tube liners suitable for 10mm soft copper.
• 50 micron nylon strainer
• Compatible with fossil, **biofuel** blends & **100% biofuels** including **HVO**.
• Aluminum filter heads are supplied with an anti-corrosion anodise finish
• Bespoke filter badging service, available upon request

TANK KIT A

UCV with single outlet.

TIGERLOOP DE-AERATOR

Original, outdoor fitment. A Tigerloop makes a one-pipe system possible for all types of oil heating installations helping to ensure environmental safety, cost effectiveness and reliability. In an oil heating system using a Tigerloop, all oil passes through the automatic oil de-aerator, which effectively removes all gas/air bubbles from the system. This eliminates oil pump and nozzle problems associated with gas/air in the oil.

No: **TL6000**

INDOOR METAL TIGERLOOP BIO DE-AERATOR

The Tigerloop Bio model is constructed externally of metal materials making it suitable for both indoor and outdoor installation in the UK & IE.
With the addition of a simple to fit 10mm vent pipe the removed air can be vented safely to the outside, ensuring only pure oil is passed through to the burner.

No: **TL7000**

FLOCO DE-AERATOR

Flow-Control 3/K-1 is for fuel oil (DIN 51603-1), diesel (DIN EN 590) also biodiesel and vegetable oils (rape oil).
The device must not be subjected to undiluted additives, alcohol and acids. TÜV-tested (S 159/02)

No: **69930**

GOK DE-AERATOR

c/w Filter. GS 2000 is a combination of an oil filter, de-aerator and shut-off valve. It is designed to be installed on oil combustion plants running on a single pipe system. With this system, a return pipe to the tank becomes superfluous which lowers costs and reduces the risk of damage to the environment in the event of a leak.

No: **3006021**

TIGERLOOP COMBI 3

The new Tigerloop Combi Bio 3 design comes with a control valve and an optional integrated vacuum gauge for full control and easy troubleshooting.

Tigerloop Combi 3 - c/w Control Valve No: **TL61101-C**
Bio Tigerloop Combi 3 - c/w Control Valve No: **TL7000-C**

TEDDINGTON KBB FIRE VALVES

KBB Fire Safety Valve
Why take the risk with anything else?

Biofuel Compatible ✓

PROTECTING HOMES AND PROPERTY
FOR 60 YEARS

The KBB fire valve is designed as a fire safety shut-off valve for use on oil burning equipment.
The valve is installed in the oil supply pipeline outside the building with the sensor mounted firmly inside the appliance above the burner.

Teddington Fire valves have 1/4" female connection ports.

FIRE VALVE TEST UNIT

- Integrated single compact unit
- Adjustable temperature setting
- Simple controls
- 230V operation
- Light weight robust construction
- Eliminates hot kettles of water
- Testing time approx 3 minutes
- 'Ready' indicator light
- Will test all types of fire valves
- Conforms to EN 60730-1:1995

The single unit test box is designed to eliminate the need for jugs of hot water to test the operation of the fire valve at initial installation or during regular servicing.
It provides a safe and simple solution to valve testing.

No: **KBT1000**

REMOTE ACTING FIRE VALVE – 7mm Phial

The use of remote sensing fire valves is covered by BS 5410: Part 1: 1997 which is referenced as a requirement in the Building Regulations and Standards.

FUELSTOP FIRE VALVES

Atkinson EQUIPMENT LTD

Fuelstop Thermostatic Capillary Fire Valve

SUITABLE FOR:	MAX FLOW RATE:	SIZES:
H Kerosene	**180LPH**	**3/8" / 1/2" BSP**

Product Description

A capillary fire valve is a **legal requirement for fuel burners.** Make sure you fit the best available by choosing Fuelstop TFV.

Unlike other fire valves, the **Fuelstop TFV** conforms to British safety standards and it is also more reliable, making the perfect choice for installers and customers. You want the best fire valve available – the one that guarantees more **safety, flexibility and reliability** with less hassle.

The Fuelstop has a **fluid filled capillary** and bellows means that it is more responsive (than other air filled capillary and bellows on the market). We can therefore set the trip mechanism with more tolerance (this does not have to be set on a hair trigger), which results in **zero nuisance tripping** and within a tighter trip range. In fact it is the only fire valve we know of that is approved to British Standard BS 799 part 5.

Features

- 3/8" & 1/2" BSP Female
- 1.5m - 35m Capillary length (depends on model)
- Temp Ranges: 66°C to 72°C and 86°C to 95°C
- Flow rate: 180 litres per hr /1.2m head
- Liquid filled capillary
- OFTEC Approved

TANKMASTER

COMPLETE BODY

Designed to fit steel or plastic oil heating storage tanks. Eliminates the need for a seperate gate valve, level gauge, filter and several pipe fittings.

- Dimensions -155mm x 80mm
- Flow Rate - Up to 36 litres/hour
- Tank Connection - 1/2" BSP
- Oil Level Valve - Pull to read (self closing)
- Sight Tube - 4ft 6" or 6ft (sold seperate)
- Oil Line Outlet - 10mm compression
- Complies with BS799 Part 2

The filter should be replaced whenever the boiler is serviced and is not washable.

Sight Gauges should not be fitted to bunded tanks; however, they may be used on any single skinned tank or in any area that is protected by a bund.

OUF-88

OUF OIL LIFTERS

The OUF88 range of oil lifters should satisfy most domestic market requirements.
Can be used to replace the no longer available BM346 lifter. Suction lift 8 litres @ 8 metres vertical and up to 25m horizontal pipe run on 8mm inside diameter pipe.

This lifter has a third port to be used for an overflow pipe which has to be returned to the tank.

If it is not possible to do so an IR leak detector driptray has to be used. (Sold Seperately)

WATCHMAN TANK GAUGES

WATCHMANSONIC
ULTRASONIC OIL LEVEL MONITOR

The revolutionary electronic measuring gauge showing how much liquid there is in your tank and setting off an alarm when there is a sudden drop in liquid levels

Features & Benefits

Quick and easy to install and one model fits all	Unique Serial Number	Suitable for steel or plastic tanks	Sudden Drop Alarm (ON/OFF)	Waveguide Mode (ON/OFF)	Low power consumption	200 metre transmitter to receiver range	Measures tanks up to 3 metres in height	Audible buzzing tone when liquid levels run out

The Kingspan Watchman Sonic Advanced is a revolutionary electronic measuring gauge that monitors how much oil there is left in your oil tank and sets off an alarm in your home in the event of a sudden drop in oil levels.
This helps you to ensure that you never run out of oil.

• Optional upgrade to Watchman SENSiT, allowing you to get oil level notifications directly to your phone.
• One model fits all
• 200 metre transmitter to receiver range
• Audible alarm when oil levels run out
• Measures tanks up to 3 metres in height

BUNDED OIL STORAGE TANKS

TITAN
EcoSafe® Oil Storage Tanks
Product Guide

Complete bunded oil storage tanks
available from 1,000 — 9,000 litres

Kingspan Titan oil tanks have been specifically designed and engineered as a first choice storage solution for homeowners, contractors, developers and any other businesses with large capacity oil storage needs.

HORIZONTAL BUNDED 1000

Capacity	1000ltr
Length	2150mm
Width	690mm
Height	1500mm

No: **ES1000**

HORIZONTAL BUNDED 1225

Capacity	1225ltr
Length	2050mm
Width	900mm
Height	1525mm

No: **ES1225**

HORIZONTAL BUNDED 1300

Capacity	1300ltr
Length	1920mm
Width	1230mm
Height	1300mm

No: **1300BHA**

HORIZONTAL BUNDED 1800

Capacity	1800ltr
Length	2370mm
Width	1300mm
Height	1355mm

No: **ES1800**

HORIZONTAL BUNDED 2500

Capacity	2500ltr
Length	2450mm
Width	1425mm
Height	1490mm

No: **ES2500**

LOW PROFILE 1200

Capacity	1200ltr
Length	1940mm
Width	1540mm
Height	1090mm

No: **ESLP1200**

SLIMLINE BUNDED 1000

Capacity	1000ltr
Length	1920mm
Width	600mm
Height	1580mm

No: **ESSL1000**

SLIMLINE BUNDED 1400

Capacity	1400ltr
Length	2200mm
Width	650mm
Height	1680mm

No: **ESSL1400**

SLIMLINE BUNDED 2000

Capacity	2000ltr
Length	2500mm
Width	800mm
Height	1700mm

No: **ESSL2000**

VERTICAL BUNDED 1300

Capacity	1300ltr
Diameter	1550mm
Height	1490mm

No: **ESV1300**

VERTICAL BUNDED 2500

Capacity	2500ltr
Diameter	2000mm
Height	1490mm

No: **ESV2500**

VERTICAL BUNDED 3500

Capacity	3500ltr
Diameter	2180mm
Height	1945mm

No: **ESV3500**

VERTICAL BUNDED 5000

Capacity	5000ltr
Diameter	2250mm
Height	2400mm

No: **ESV5000**

VERTICAL BUNDED 9000

Capacity	9000ltr
Diameter	2480mm
Height	2960mm

No: **ESV9000**

EXOCET FUEL ADDITIVES

A specialist fuel additive designed to improve the burn quality of domestic kerosene when used in range-style cookers and/or where vaporising burners are being utilised.

Ideal for burners which continually 'coke' up or have fuel pipe blocks.

- Lowers char value
- Reduces build up of carbon deposits and soot
- Inhibits growth of deposits in fuel storage tanks
- Minimises the potential for fuel tank corrosion
- Increases the fuel shelf life
- Reduces service problems
- 1 Litre of additive treats 5000 litres of fuel (1:1000)

Exocet Cooker
200ml No: **X01482TA200**
1 Litre No: **X01482TA1**

Exocet Boiler
200ml No: **X01410HO200**
1 Litre No: **X01410HO1**

OIL METERS - MECHANICAL

- Suitable for heating oil, naphtha, diesel and petrol applications
- Volume display on roller counter, in litres
- For horizontal, vertical or inclined mounting
- Threaded or flanged connections
- Suitable for temperatures for up to 130°C

VZO4	4mm (1/8")	Flow Range 1 – 50 litres/hr
VZO8	8mm (1/4")	Flow Range 4 – 135 litres/hr
VZO15	15mm (1/2")	Flow Range 10 – 400 litres/hr
VZO20	20mm (3/4")	Flow Range 30 – 1000 litres/hr
VZO25	25mm (1")	Flow Range 75 – 2000 litres/hr
VZO40	40mm (1" 1/2)	Flow Range 225 – 6000 litres/hr
VZO50	50mm (2")	Flow Range 750 – 20,000 litres/hr
VZO4-RV	4mm (1/8") c/w pulse output	Flow Range 1 – 50 litres/hr
VZO8-RV	8mm (1/4") c/w pulse output	Flow Range 4 – 135 litres/hr
VZO15-RV	15mm (1/2") c/w pulse output	Flow Range 10 – 400 litres/hr

Oil burner maintainance

Maintainance
means reliability

Your oil burner needs the same attention as your car in order to perform at its best. It takes regular cleaning, inspection and servicing to make sure it's in perfect shape and running in a reliable way.

A well-adjusted oil burner is far more efficient and can **save you up to 10% or even more in oil use**. If soot builds up, the oil use will go up with 2-4% per mm soot layer.

Extra oil use

15%

10%

5%

0%

0 mm   1 mm   2 mm   3 mm   4 mm

Soot layer
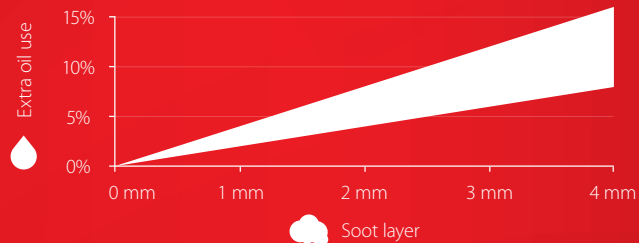

To obtain savings and minimize risk the annual **service should include:**

Replacement of oil nozzle

Save up to
10%
in oil use with an annual burner service

Replacement of pump filter

Replacement of main cartridge filter

Cleaning and fine tuning

An annual service will help ensure:

Energy savings

Money savings

Minimum pollutions

Longer burner lifetime

Avoid break downs

Greener heating

Oil Appliances

GRANT OIL CONDENSING BOILERS

An award winning, tried and tested oil-fired boiler range
The name 'Grant' has in recent years become synonymous with highly efficient oil-fired central heating appliances. Designs like the 'Multi Pass' boiler achieved efficiency levels far in excess of any UK or European Standards and have helped thousands of homes to reduce their annual fuel bills. So it will come as no surprise to see Grant yet again leading the way with the Grant Vortex oil-fired condensing boiler range with exceptional SAP2009 efficiencies up to 93.3% gross (97% gross for SAP2005). Grant's ultra-high efficiency condensing oil boiler range has been on the market for over 15 years and now features 63 different model variations, with outputs ranging from 12 - 70kW (50,000 - 240,000 Btu/h).

What is a condensing oil boiler?
Condensing boilers differ from traditional boilers in that they are designed to capture heat normally lost through the flue system during the combustion process. Unlike traditional oil-fired boilers the Grant Vortex condensing boiler has a built-in stainless steel heat exchanger incorporating Grant's unique turbulator baffle system, which cools the gases to a point where the latent heat, normally lost to the atmosphere through the flue, can be usefully extracted. The additional energy recovered enables the boiler to operate continuously at much higher efficiency levels, resulting in lower heating and hot water running costs.

Easy to commission, service and maintain
As with all oil-fired appliances, Grant Vortex Condensing Oil Boilers require commissioning at the time of installation. This simple process ensures that the boiler is working at peak efficiency which, in turn, will result in lower running costs and long term reliability. Annual maintenance is also made easy by Grant's cleverly designed front service access to both the burner and all the internal serviceable parts. This feature enables Grant Vortex Condensing Boilers to be fitted neatly and unobtrusively within either the kitchen or utility room environment. Alternatively, if internal siting is problem, space-saving outdoor versions are available.

**The innovative VortexBlue Range**
As part of its dedication to cleaner energy, Grant introduced the Grant VortexBlue range which combines its proven condensing boiler technology with a revolutionary new blue flame. Using a new state-of-the-art Riello Blue Flame compact burner alongside the familiar Vortex oil-fired-boiler, this market-leading combination gives you an easy to install, reliable product with those all-important low emissions.

VORTEX ECO UTILITY RANGE

The Grant Vortex Eco Utility range was launched as a direct response to customer demand for a competitively priced condensing boiler.
The Eco models incorporate the latest version of the Grant Vortex stainless steel heat exchanger. Out-puts range between 15kW and 35kW (50-120,000Btu/h) with SAP 2009 gross seasonal efficiencies of 90.3 - 90.8% gross.
As you would expect from a product with this pedigree, Grant Vortex Eco Utility boilers are exceptionally quiet in operation and feature the latest Riello burner technology. The boilers also have a simplified casing, control panel and pipework arrangement, making them the ideal choice for utility room installations. All standard Eco Utility boilers are designed to allow the burner and combustion chambers to be serviced from the front, however, models fitted with a sealed system kit require top service access.

VTXECO21/26	Vortex ECO Utility Internal 21/26 kW
VTXECO26/35	Vortex ECO Utility Internal 26/35 kW
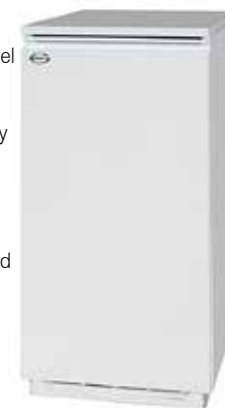

VORTEX ECO WALL HUNG RANGE

Available in outputs ranging from 12-21kW, in both sealed system and open-vented system variants, these new appliances are pre plumbed and encompass Grant's patented Vortex stainless steel heat exchanger and turbulator baffle system. All internal models require a separate flue kit (not supplied with the boiler) and are compatible with all Grant EZ-Fit low level, high level and vertical flue systems, so now almost any installation situation can be catered for.

VORTEX ECO OUTDOOR RANGE

Today, as around one in four oil boiler installations are external, Grant have expanded the number of options available with the launch of three competitively priced Eco External modules. The models have outputs between 15kW and 35kW (50-120,000Btu/h) and SAP 2009 gross seasonal efficiencies of 90.3 - 90.8% gross. Grant's wall hung oil-fired boiler range comprises four internal and four external models.

VTXOMECO21/26	Vortex ECO External 21/26 kW
VTXOMECO26/35	Vortex ECO External 26/35 kW

VORTEX PRO OUTDOOR RANGE

All Pro External modules enjoy the same unique features as the Eco External modules including the factory fitted multi-directional flue, high quality external powder coated casing, built in frost protection, mains isolating switch and a test switch.

However, in addition, the boilers have a higher efficiency level and are factory wired to receive an 'optional' RF (radio frequency) wireless programmer. In this situation, the receiver can be plugged into the control panel of the module, enabling the boiler to be operated using a remote controller from any room inside the house, without the need for hard wiring.

VORTEX PRO BOILER HOUSE RANGE

The new Grant Vortex Boiler House models come in a distinctive powder coated casing in our iconic Grant red and feature an externally mounted Riello RDB burner and dual thermostat.
They have high energy efficiency ratings which not only significantly lower fuel bills but also considerably reduce greenhouse gas emissions and lessen the enviromental impact of domestic hot water and heating systems.
The Grant boiler House models are ideal for locations that are difficult to access like cellars or plant rooms, where a white cased utility version is not always the best solution. The Boiler House models encompass the same unique stainless steel heat exchangers used in other Vortex boilers together with Grant's exclusive turbulator baffle system which provides ultra-high efficiency and low running costs. These additions to the Vortex range are compatible with all Grant EZ-Fit Flue systems and are flued in exactly the same way as Utility models, further enhancing installation options.

VTXBH46/58	Vortex PRO Boiler House 46/58 kW
VTXBH58/70	Vortex PRO Boiler House 58/70 kW

VORTEX PRO KITCHEN UTILITY RANGE

The Grant Vortex Pro Kitchen/Utility range has been upgraded to enable a number of new programmer options to be used with the appliance. A plug-in programmer (Product code: EPKIT) can be installed within the fascia, or alternatively, the receiver for Grant's new wireless RFT Kit (Product code: RFTKIT) can be located within the knockout and the programmer sited conveniently within the building. The boilers have very high SAP 2009 gross seasonal efficiencies of between 90.7 - 93.3% and feature the 'award winning' unique Grant Vortex stainless steel condensing heat exchanger, and turbulator baffle system. The 15-21 utility model has been designed to fit within a kitchen unit and, due to its reduced width, can be used as a direct replacement for most older oil-fired boilers.

VORTEX PRO COMBI RANGE

Grant Vortex Pro Combi features much larger heat exchangers which, due to their low water content and larger surface area, vastly increase the hot water performance available and mixing valves are pre-set at 50°C, controlling accurately the hot water draw off temperature from the boiler. They also feature a low system pressure cut off switch, enabling the combi to protect itself in the unlikely event of system water loss. Additionally, there are two very accurate electronic temperature controls which allow the boiler to operate in condensing mode on central heating, whilst maintaining its instant hot water production.

OIL APPLIANCES - GRANT BOILERS

OIL APPLIANCES - GRANT BOILERS
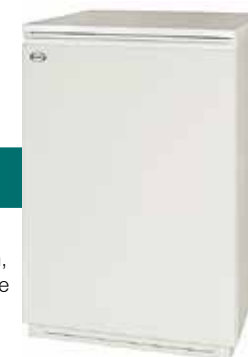

VORTEXBLUE INTERNAL RANGE

The Grant VortexBlue combines our proven condensing boiler technology with a revolutionary new blue flame. Using a new state-of-the-art Riello Blue Flame compact burner alongside the familiar Vortex oil-fired boiler, this market-leading combination gives you an easy to install, reliable product with those all-important low emissions. The Grant VortexBlue internal models combine our existing proven condensing boiler technology with the latest Riello RDB BLU compact burner. The boilers feature a sleek white casing, unique control panel with neon diagnostic indicators and simplified pipework arrangement, making them the ideal choice for utility room installations.

VORTEXBLUE COMBI RANGE

The intelligent VortexBlue Combi incorporates the latest Riello RDB BLU burner technology and combines it with our award winning Vortex stainless steel heat exchanger. The Grant VortexBlue Combi features large heat exchangers which, due to their low water content and larger surface area, vastly increased the hot water performance. With a low system pressure cut off switch, the combi protects itself in the unlikely event of system water loss.

VORTEXBLUE EXTERNAL RANGE

The Grant VortexBlue external modules have some of the highest oil-fired boiler efficiencies available today. These models are ideal for situations where a white cased kitchen/utility version is not always the best solution, possible due to limited space within the home.
All modules include a factory fitted multi-directional flue, high quality external powder coated casing, built in frost protection, mains isolating switch and a test switch.
Just as other VortexBlue boilers, this range also incorporates Riello's RDB Blu burner technology teamed with our patented Vortex stainless steel heat exchanger.

EXTERNAL COMBI BOILERS

The Firebird ranges of external Combi Boilers are similar in specification to their equivalent internal models, with the addition of a built-in frost thermostat.

There is no requirement to house the boiler in a building, so this option provides an ideal solution if internal space is at a premium.

The boilers have removable sides for ease of access to any part of the unit.

Piping can be carried out from the back or from underneath.

OIL APPLIANCES - FIREBIRD BOILERS

FRANCO BELGE ◆◆

Oil stoves, the smart option

- Clever -They look and feel like a wood burning stove but without the work involved cutting logs and their storage. An oil tank is all you need.
- Clean - No carrying wood into the house and ash out with all the resulting mess that can cause. No unexpected wildlife taking up residence in your home.
- At over 75% efficiency they can cost as little as £2.04 per day to run (Belfort - based on 50p per litre).
- They require no electricity to run. Once lit the gravity oil flow will keep it burning, so even in a power cut you are guaranteed a warm room in your home. Open the door to the room and let the stove heat a greater area. They come as standard with Franco Belge's unique ignition system allowing simple, no mess, lighting.

- Designed to provide a continuous source of background heating with the ability to increase the heat output at the turn of a dial. The result is less temperature variation, which minimises cold draughts, and because

it never has to heat the house from cold a smaller heat output is required from the stove than would be required from a cycling system or wood burning stove to heat a similar area.
- Low maintenance. The Franco Belge vaporising burner pot burns so efficiently that carbon deposits are kept to a minimum. The operation of a simple de-coking rod on the inlet for the oil into the burner is all that is required during the heating season. Like all heating appliances a yearly service by an OFTEC engineer is required.
- Peace of mind. ABGO's experienced technical team are available to answer any questions you may have. Spare parts are not an issue either and with nearly 50 years of supplying the heating industry throughout the UK you will never be let down.

SAFETY PRODUCTS

Protecting families from fire, smoke and carbon monoxide.

10 YEAR LONG LIFE — FHB10
Smoke Alarm

- Unique **X-Profile** detection chamber.
- **TSE-Technology** provides stability across a range of environmental conditions.
- Wireless interlinkable version – **FHB10W** available for interlinking to other FireHawk alarms
- **Sealed in** 10 year Lithium battery.

10 YEAR LONG LIFE — FHH10
Heat Alarm

- **Advanced Thermistor Detection** controlled by bespoke software.
- Wireless interlinkable version – **FHH10W** available for interlinking to other FireHawk alarms
- **Sealed in** 10 year Lithium battery.

7 YEAR — CO7B
Carbon Monoxide Alarm

- **7 year sensor**. Top quality figaro electrochemical sensor.
- **Versatile mounting system** allows alarm to be fixed to a surface or to be used free-standing.
- **Sealed in** long life Lithium battery.

10 YEAR — CO7B-10Y
Carbon Monoxide Alarm

- **10 year warranty**
- **FIREHAWK DATA SCAN** – data extraction using Firehawk App
- Wireless interlinkable version – **CO7B-10Y W** available for interlinking to other FireHawk alarms

REZNOR PHOTON UNIT HEATERS

- » Extended operational life.
- » 4-pass heat exchanger technology.
- » Single burner with multi-try ignition for enhanced reliability.
- » All units are available for natural gas (G20, G25, G25.3) as standard.

Gas Models	Power Output
PHOTON10	10kW
PHOTON20	20kW
PHOTON25	25kW
PHOTON35	35kW
PHOTON45	45kW
PHOTON55	55kW
PHOTON65	65kW
PHOTON70	70kW
PHOTON100	100kW
PHOTON120	120kW

REZNOR COMET+ CABINET HEATERS

- » Incorporates the latest generation of heat exchanger technology to become an industry benchmark for design and performance.
- » High efficiency condensing versions are available for all natural gas fired models giving 101% efficiency and significant fuel savings.
- » Oil Fired & Propane range also available.

REZNOR DESTRATIFICATION FANS

- » Heat recovery by re-circulating high level hot air back to occupancy level.
- » Reduces fuel bills by eliminating excess heat loss through the roof.
- » Reduced pre-heat time.

COMBAT® ELITE SUSPENDED UNIT HEATERS

- » Incorporates a new innovative air stream system which offers enhanced energy efficiency.
- » Well suited for commercial and industrial applications.
- » Easy to install, maintain and operate with a wide range of options.
- » Available in room sealed or open flued installation.
- » Automatic ignition burners for ON/OFF operation only.
- » Lockout indicator lights help make troubleshooting easier.
- » For long life, the heaters utilise aluminised steel heat exchangers.

Gas Models	Power Output
ELUA40G	40kW
ELUA50G	50kW
ELUA60G	60kW
ELUA75G	80kW
ELUA90G	93kW
ELUA100G	100kW
ELUA115G	114kW

COMBAT® ELITE CABINET HEATERS

- » Supplied with a pre-mounted Combat controller and a 'Plug & Play' mains connector.
- » Available with horizontal or vertical distribution heads.
- » Complies with ERP directive, and meets efficiency requirements.
- » Re-designed distribution heads for an aesthetically sleek appearance.
- » Modified heater fixings to allow easier routine service access.
- » Fitted with a packaged burner utilising two-stage technology.
- » Oil fired heaters are supplied with an oil line connection kit for installation on site.

Gas Models	Power Output

COMBAT® ENERGY SAVING FANS

- » Complete with built in adjustable thermostat to activate the fan at the set temperature.
- » Remote control options available.
- » Re-circulates warm air downwards to where it is required.
- » Saves running costs.

The DUNGS GasMulitBloc® integrates filter, regulator, valves & pressure switches in one compact fitting.

- Dirt Trap Micro Filter.
- Simple mounting, compact, light-weight.
- Suitable for gases of families 1, 2, 3 and other gaseous media.
- Flange connections with pipe threads as per ISO 7-1.
- Sensitive setting of output pressure by proportional regulator as per DIN EN 88 Class A Group 2.
- Hydraulic opening delay.
- Fast & slow opening.
- High flow rates with low pressure drop.

BALTUR BTG SINGLE STAGE GAS BURNERS

Baltur BTG gas burners have the ability to obtain optimal combustion values by regulating combustion air and blast-pipe.

The exhaust gas recycling blast-pipe is able to achieve very low pollutant emissions, particularly with regard to nitrous oxides (NOx) (class II for BTG 15 and class III for BTG 20 according to EN 676 norm).

Maintenance is facilitated by the fact that the mixing unit can be removed without having to remove the burner from the boiler.

Features:

Manual air flow adjustment. Possibility to chose gas train with valve tightness control.

Comes with a 7-poles connector, 1 flange and 1 insulating seal to connect the burner to the application.

Light aluminium alloy fan part. High performance centrifugal fan. Combustion air inlet with device to adjust the air flow; automatically closing air gate.

Sliding boiler coupling flange to adapt the head protrusion to the various types of boilers.

Adjustable blast-pipe with stainless steel nozzle and deflector disk in steel.

Monophase electric motor to run fan. Air pressure switch to ensure the presence of combustion air.

Gas train complete with operation and safety valve, minimum pressure switch, pressure regulator and gas filter.

Sequence controller - EN 298.. Flame scanning by ionisation electrode. 7 pole outlet for burner electrical and thermostat supply. Prepared for microamperometer connection with ionisation cable. Electrical plant protection rating IP40.

Sound-proof plastic protective cover.

NUWAY M SERIES GAS BURNERS

These burners are available for use on natural gas, LPG, towns gas and biogas with single stage on/off, two stage high/low or modulating operation.

They are typically suited for commercial hot water boiler systems and steam boiler systems.

Features:

Quick and easy installation

Reliable and trouble free operation

Industry standard components available, most components can be easily accessed allowing for easy maintenance.

Also available:

Larger gas train options

Speed control (available only on certain models) to improve fuel efficiency and energy saving.

All M series burners have been design in accordance with EN676 and EN267.

ECOFLAM MAXGAS LO NOX SINGLE STAGE GAS BURNERS

High efficiency fan ventilation system (HPV) allowing easy matching with boilers having high combustion chamber pressure.

Combustion head easy to assemble and adjust for fine set up.

Single bolt burner fixing with the possibility to firmly secure it to the flange in three different positions for easy maintenance.

Separate gas train (available for different inlet gas pressure) easy to assemble into the burner.

The hinge flange allows accessibility to burner head without losing burner settings.

New control box Thermowatt allowing to improve the interface with service personnel. The digital display (PAB versions) featuring the interactive language with pictograms gives real time information about burner operation and statistics stored during the heating season.

ECOFLAM BLU TWO STAGE GAS BURNERS

All burners feature high versatility on different types of domestic, commercial and industrial application.

Aluminium casing up to BLU 2000.1 and steel casing from 3000.1 with electrical panel IP40 on board.

Adjustable combustion head for fine-tune regulation and matching with different combustion chamber.

Modulating version with PID system controller with digital set point display and real time value.

Separate gas train (available for different inlet gas pressure) easy to assemble into the burner.

Configurated and special version on request for selected type of applications and fuel characteristics.

DUOBLOCK and ELECTRONIC versions are available on request for selected output to match main boilers and industry applications.

THISION S PLUS GAS CONDENSING BOILERS

The Thision S Plus range of wall mounted gas fired condensing boilers provide the highest levels of seasonal efficiency, a low environmental impact and lifelong reliability. The range includes 3 units with heat outputs at 33.6kW, 44.9kw and 52.9kW @ 80/60°C. The stainless steel heat exchanger is constructed using multi-pipes with generous wall thickness for strength and durability.

These are configured in such a way to return the highest levels of efficiencies and are spaced to optimise flue gas temperature zones to ensure extremely low NOx and CO emissions for protection of the environment.

In-built energy saving pump for improved efficiencies.

Outside air sensor (QAC 34) included allowing weather variable flow temperatures to be delivered to the heating system.

DHW sensor (QAZ 36) included as standard.

Extensive flue lengths over considerable distances thanks to an over-pressure of 90 Pa.

Turndown ratio up to 6:1.

Stainless steel heat exchanger for lifetime efficiencies.

Down-firing ceramic burner.

Extremely low NOx emissions

10 year guarantee with service plan uptake.

5 YEAR Warranty

GAS PROVING WITH VENT INTERLOCK

Protects people and property by testing for leaks before allowing the gas on

No: **1000V**

COMMERCIAL KITCHEN GAS INTERLOCK

With electric isolation & vent interlock

No: **1000V+**

GAS PROVING WITH ISOLATION

Electric & water isolation & vent interlock system

No: **1000VW+**

MERLIN GDP2 SAFE AREA DETECTOR

Can be used with up to two gas detectors for multi area

No: **GDP2**

GD2X SAFE AREA GAS DETECTOR

Identifies up to 8 gas detector gas levels, and in which monitoring zone the detector is located

No: **GDP2X**

MERLIN GDPX+ SAFE AREA DETECTOR

16 zone gas pressure proving & detection panel which can be used in many applications

No: **GDPX+**

MERLIN GDP4 SAFE AREA DETECTOR

Can be used with up to four gas detectors in a number of combinations

No: **GDP4**

COMMERCIAL KITCHEN GAS INTERLOCK

Specifically for use in commercial kitchens to meet BS6173

No: **MERLIN CT1200S**

COMMERCIAL KITCHEN GAS INTERLOCK

Acts as an interlock between the ventilation system and the gas solenoid valve

No: **MERLIN CT1250X**

GAS INTERLOCK FOR UPTO FOUR FANS

Allows compliance with BS6173 for commercial kitchens

No: **MERLIN 1500S**

GAS INTERLOCK WITH LCD MONITORS

Acts as an interlock between the ventilation system and the gas solenoid valve

No: **MERLIN CT1650+**

GAS INTERLOCK SOLID FUEL KITCHENS

For use in commercial kitchens with solid fuel appliances and charcoal ovens/grills

No: **MERLIN CT1750**

COMMERCIAL KITCHEN GAS PROVING

Allows compliance with BS6173 for commercial kitchens

No: **MERLIN 2000X**

COMMERCIAL KITCHEN GAS PROVING

Allows compliance with BS6173 for commercial kitchens

No: **MERLIN 2000S**

KITCHEN CONTROL ENERGY SAVING SYSTEM

Energy saving system designed specifically for commercial kitchens

No: **MERLIN 3000S**

BOILER ROOM GAS PROVING & DETECTION

Carries out a gas proving test on the pipe work in order to highlight if there is a gas leak

No: **1000BH**

COMMERCIAL KITCHEN GAS INTERLOCK

Designed specifically for use in commercial kitchens to meet BS6173

No: **MERLIN CT1250**

FIRE ALARM BYPASS SWITCH

Temporarily bypass the gas isolation system

No: **FAB-1**

CARBON DIOXIDE MONITOR

Provides a visual indication of the present CO2 Levels

No: **CO2-SENSOR-AVG**

24V CARBON MONOXIDE SENSOR

Works in conjunction with other Merlin Gas Safety Systems to ensure maximum safety

No: **CO SENSOR (24V)**

24V LPG SENSOR

Provides an audible/visual alarm activation if alarm levels of gas are detected

No: **LPG SENSOR (24V)**

24V NATURAL GAS DETECTOR

Works in combination with the S&S Merlin range of Gas Detection panels and Safety Systems

No: **NG DETECTOR X**

24V NATURAL GAS SENSOR

Provides an audible/visual alarm activation if alarm levels of gas are detected

No: **NG SENSOR (24V)**

24V OXYGEN DETECTOR

Works in combination with the S&S Merlin range of Gas Detection panels and Safety Systems

No: **OXYGEN DETECTOR X**

24V LPG DETECTOR

Works in combination with the S&S Merlin range of Gas Detection panels and Safety Systems

No: **LPG DETECTOR X**

COMBINED NG & CO DETECTOR

Dual gas sensor carefully designed and tested to monitor Natural Gas - Methane (CH4) and Carbon Monoxide (CO)

No: **MERLIN CH4CO**

WATER DETECTION PANEL

Designed to help achieve the requirements of 2018: 1.0 BREEAM UK New construction

See why it's time to say goodbye to the mechanical water meter and hello to the benefits of smart metering

MULTICAL® 302

The Multical 302 meter employs the highly accurate ultrasonic technology. Every conceivable drop is measured due to the dynamic range 1600:1 from saturation flow to start flow (250:1 from qp:qi) reducing loss of distributed energy.

No: **MC302**

MULTICAL® 403

The Multical 403 meter ranges from qp 0.6 to qp 15 m³/h, and can therefore be used in applications ranging from apartments and houses to shopping centres and office buildings.

No: **MC403**

MULTICAL® 603

The first and only plug-and-play meter on the market. The Multical 603 heat and cooling meter comes with a built-in Auto Detect function, making it possible to replace the Ultraflow® when needed, without having to manually re-configure the calculator.

No: **MC603**

MULTICAL® 801

The Multical 801 is a rugged, robust energy calculator that is ideal for commercial and industrial installations with a wide range of communication possibilities. Resistant to dust, humidity and water, the meter will continue measuring no matter how hostile the conditions.

No: **MC801**

MULTICAL® 6M2

MULTICAL® 6M2 is an all-purpose energy calculator specifically tailored for mixed fluid applications with medium temperatures from -40 °C to 140 °C.

RAYBURN COOKER SPARES - 600/700 SERIES

RAYBURN COOKER SPARES - 400 SERIES

HEATRANGER 600/700 SERIES

Offering outstanding performance with ultimate flexibility, the Rayburn 700 Series delivers exceptional cast iron range cooking. To encourage fuel efficiency and energy saving, the Heatranger 600 has an Eco mode for the boiler to ensure it runs at its optimum efficiency of over 85%.

HEATRANGER 400 SERIES

The Rayburn 400 series cookers were introduced in 1994. During the autumn of 1997 the range was significantly revised and become known as MX.
February 2001 saw the introduction of an alternative Ecoflam oil-burner (MXE).

RAYBURN from AGA

XT & 400K/G PX

Introduced during 1996, the 400 is primarily intended for homes that already have a conventional boiler serving the central heating system.
During 2002 a power flue model (400 PF) was introduced. The XT was introduced in 2005.

480AG AND GD80

Introduced in 1992, the Rayburn GD80 had two independently controlled atmospheric gas burners. In 1994 the models were re-designated as the 380G (natural gas) and 380L (propane). Production of the 380G & 380L ceased in autumn 2000.
The 480AG/AL was introduced in March 2001.

OF7 AND 208/308K

The Rayburn 208K was introduced in 1994, as the successor to the OF7. The 308K arrived in 2000 with a much larger hotplate.
Production of the 200K and the 208K ceased during 2007 having largely been superseded by the 300 series.

SUPREME AND ROYAL

The Rayburn Supreme was introduced in 1982 for use with a range of solid fuels. Production ceased in 1992, being replaced by the Nouvelle, which had been introduced in the mid 1980's. Introduced in 1958, the Royal replaced the No.3. It is still in production today as a 212SFW.

RAYBURN

Made by AGA

RAYBURN No.1 No.2 & No.3 BRICK SETS

The Rayburn No.1 was the first generation of 'Rayburn' cooker, introduced in 1946 and manufactured up to about 1958.
Both Old and New pattern had a single oven and was available as a L.H. or R.H. oven version.
The No.2 was produced from the late 1940's until the mid 1950's. Introduced in about 1950, the Rayburn No. 3 was similar to the No.2 model, having 2 ovens - a main cooking oven above a smaller warming oven. Manufacture continued to about 1958, when it was re-designed and launched as the Royal.

BRANDON CONDENSING OIL

Combining the classic look of the Stanley Brandon range cooker with the latest technology to improve the efficiency of your home.
The Stanley Brandon 80k
condensing range cooker delivers the same excellent cooking performance as the existing Brandon range cooker together with hot water and central heating with highly efficient condensing technology.

Key Features
• A-rated boiler with over 92% efficiency to comply with all current building regulations
• Heats up to 16 standard radiators (80,000 BTUs)
• Suitable for under floor heating and zoning
• Ovens have rapid heat-up time
• Twin chrome hotplate covers
• Chrome towel rail
• Stylish Stanley badging and temperature gauge
• Balanced and Conventional Flue Options
• Dedicated on/off time for cooking
• Twin burners so cooking and central heating can be controlled separately
• 'Eco' setting ensures the boiler is running at optimum efficiency

Technical Specifications
Function	Cooking, Hot Water & Central Heating
Width	990mm
Depth	600mm
Height	920mm
Weight	395kg

BRANDON OIL

The Stanley Brandon, is a beautifully designed statement at the heart of your kitchen.
Combined with the majestic presence of Stanley, the Brandon strikes the perfect chord between past and present.
The Stanley Brandon is the ultimate range cooker for style and precision control.

Key Features
• Suitable for under floor heating and zoning
• 3 central heating models - 12, 16 or 20 radiators
• Twin chrome hotplate covers
• New simmer plate cover
• Chrome towel rail
• Stylish Stanley badging and temperature gauge
• Automatic seven-day programmer
• Digital display and electronic controls
• 3 channel times for separate control of hot water, central heating and oven preheat to 150ºC
• Dedicated on/off time for cooking

STANLEY™

NUA ELECTRIC

A New generation of all-electric Stanley. The fully-electric Stanley NUA provides flexible, energy-efficient cooking and beautiful retro styling to your home.
The cooker includes two large capacity radiant ovens plus a warming oven, which operate independently. It also benefits from a grill, a cast iron hotplate, which can be set to boiling or simmering mode and two-zone induction hob.

Key Features
• Controllable cast iron hotplate with boiling and simmering modes
• Two-zone induction hob with bridging feature which provides the option of a larger cooking surface for griddling
• Enamelled steel, radiant roasting oven with 900W grill
• Enamelled steel, radiant oven that can be set to baking or simmering mode
• Warming oven for heating crockery or keeping food warm until serving
• Easy to use control panel
• No servicing, plinth or flue required
• Improved energy-efficiency and lower running costs with E-Setting

RANGEmaster

AGA RANGEmaster
Group plc

Rangemaster is Britain's best loved range cooker brand. They made the world's first range cooker in 1830 on the very same site in Royal Leamington Spa where they continue to design and manufacture all 90,100 and 110 cm range cookers.

Their range cookers are at the heart of more homes than any other, helping to create memorable family moments.

As Britain's No.1 cooker manufacturer, they're a pivotal part of everyday life. Rangemaster cookers are really the essential ingredient to a perfect kitchen.
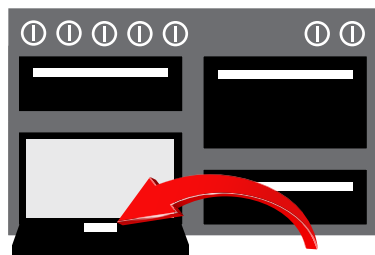

For Rangemaster cooker spares we will require the serial number from the appliance. It can be found on a sticker behind the oven door on the frame of the cooker.

Serial numbers are usually 10 digits long and do not contain letters.

ABZORB SPILLAGE KIT

Perfect kit for cleaning up oil spills upto 25 litres.
• Abzorb oil eater
• 1 metre absorbent snake
• 250ml bottle of Abxtract cleaner
• Gloves, safety goggles and Supazorb wipes

No: **A06-0006**

SWEET AIR SPRAY

Oil Neutraliser
Cherry scented
CFC free

No: **C04-60-520**

ENVIRONMENTAL OIL CLEANER

For all those oil
spills and stains

No: **C04-60-200**

CHERRY BOMB

Just leave it near the
boiler or in your van
to remove oil odours

No: **C04-60-621**

ODOUR ELIMINATOR SPRAY

Heavy Duty Neutralizer

No: **C04-60-215**

PURE AIR

Suitable for turning
all nasty smells into
pure air

No: **C04-60-225**

SWEET AIR POWDER

For instant deodorization
leaving a pleasant cherry
smell

No: **C04-60-620**

SOOT REMOVER

Place into the combustion
chamber to remove
all soot and tar
effortlessly

No: **C04-35-515**

EOGB WATER DETECTING PASTE

A simple method to
check for water in
the oil tank

No: **C04-60-406**

FUEL SPILL SPONGE

Soaks up oil by
turning into a rubber
mat.
Bio-degradable

No: **C04-60-205**

'SUCK-IT' ABSORBENT MAT

Absorbs water,
oil & other
liquids

No: **S07-0002**

ENGINEERS SERVICE MAT

Water, dirt & oil
resistant.
Place under
boilers or
radiators.

No: **REG-M38**

DUSTSHEET

Extra Heavy
12ft x 9ft

No: **DUSTSHEET**
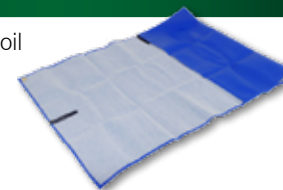

ENGINEERS GENERAL SPILL KIT 9L

Soaks up oil & water.
Contains 5 pads,
1 cushion & bag tie

No: **3011008**

KIMBERLY CLARK PAPER TOWELS

2x Ply Paper Roll 10"
Steel Blue

No: **KIMWIPE**

AMBERSIL TOUGH WIPES

Heavy duty wipes
to remove oil & grease

No: **TOUGHWIPE**

REGIN HAND WIPES

Highly absorbent duel
sided textured wipes

Multi Fuel Combustion Analyser

- Easy to use rotary switch
- Measures O_2, CO and temperature
- Calculates CO_2, CO/CO_2 ratio and excess air
- Calculates Nett, Gross and condensing boiler efficiency
- Multi fuel – Natural Gas, Propane, Butane, LPG, Light Oils (28/35 sec) and Wood Pellets

KANE250

TPI 709R Flue Gas Analyser Kit

- Combustion Efficiency Analyser:
  Measure O_2, CO, and flue temperature. Calculate efficiency, excess air, CO_2 & (CO/CO_2) Ratio.
- CO Analyser:
  Measure carbon monoxide in ambient air.
- Differential Manometer:
  +/- 150 mBar
  (0.01 mBar resolution)
  Great for Tightness/Let By or Burner Pressure Testing
- Differential Thermometer:
  Dual input K-Type thermocouple thermometer measures differential temperatures
  Ideal for Measuring & Recording Flow & Return Temperatures

6 Year Warranty

Kit options available

Kit 1 add a TPI A740 IR Printer

Kit 2 add a Printer & 2 x CK21M Pipe Clamps

Kit 3 add an IR Printer, 2 x Pipe Clamps & CPA1 Probe Kit

Kit 4 add an IR Printer, 2 x Pipe Clamps & TPI 719 Gas Sniffer

Kit 5 add an IR Printer, 2 x Temp. Pipe Clamps, CPA1 Probe Kit & TPI 719 Gas Sniffer
